ONLINE DRIVER RISK MANAGEMENT

THE SAMBA SAFETY DASHBOARD

Fewer Accidents. Serious Savings. **GUARANTEED.**

Your Comprehensive Online Control Panel for Driver Safety and Fleet Compliance

The SAMBA Safety Dashboard marshals the critical information and services needed to reduce your vehicle accident rate. Streamline and simplify your fleet safety process by managing the critical risk information for each individual driver in your fleet: Motor Vehicle Records, background checks, accident history, driver compliance files and driver training participation and history. Quickly access individual driver profiles and view the overall risk to your fleet through a single easy-to-use interface. The integrated SAMBA Safety Dashboard provides the tools you need to quickly scan your entire fleet for high-risk issues. Minimize liability, reduce preventable accidents and ensure that only qualified drivers operate company vehicles, or personal vehicles on company time. Manage your fleet at a glance and easily stay ahead of upcoming deadlines, license expirations and renewal dates. Automated alerts highlight the most urgent issues that need your immediate attention. The online SAMBA Safety Dashboard gives you all the information you need to know – *in time to make a difference.*

Recognize Your Risk Safeguard Your Fleet

Your drivers are your fleet's greatest asset – and its greatest potential liability. In today's economy, employees are more concerned than ever about retaining their jobs. Relying on employees to notify management about a recent citation or DUI/DWI, is risky business. Your ability to quickly identify new citations, unlicensed and high-risk drivers each month, is your single most effective tool in reducing costly preventable accidents.

Monitoring the driver records of all employees ensures reduced liability and fewer preventable accidents.

What Your Drivers' Accidents Really Cost

Accidents are the biggest safety threat to your employees, your community and your budget. On-the-job accident costs and injury claims are a significant expense for any fleet. When health costs, direct costs and liability are all factored in, total accident costs can become monumental. The average overall cost of a single accident, including Wage Risk Premiums, is over \$24,500 per incident, but your liability can increase 100-fold if the driver's license was suspended at the time of the accident. Diligent driver record monitoring ensures that you have the critical and timely information you need to ensure every driver in your fleet is qualified.

COST TO EMPLOYERS *Including Wage Risk Premium*

Per crash: \$24,536	Per Injury: \$128,178	Per Non-fatal injury: \$105,124	Per fatality: \$3,810,838
---------------------	-----------------------	---------------------------------	---------------------------

KNOWLEDGE IS POWER

Critical and Timely Information Is Your Most Effective Prevention Tool

SAMBA FleetWatch™ Driver Record Monitoring — *Nothing is More Effective*

SAMBA FleetWatch simplifies and automates the way employers monitor drivers and manage driving records. In addition to providing instant access to online driving records, FleetWatch automatically checks an organization's driving records for new violations, DUI/DWI convictions, license suspensions, cancellations, revocations, and approaching license renewal dates. Every month, a concise report identifies new incidents so that you may take action – *before serious accidents occur.* In addition, FleetWatch allows you to order national Motor Vehicle Records for pre-employment screening and automatically archives records and reports for 24/7 access.

SAMBA Online Driver Training — *Skilled Drivers Save Lives and Dollars*

Once FleetWatch has identified your unlicensed or high-risk drivers, you can take appropriate action. SAMBA offers web-based driver training to educate your employees on the risks of careless driving behavior – speeding, tailgating, wrong turns—and reinforces safe driving skills. By mandating the highly effective driver training classes to employees, fleet operations can achieve and sustain substantial reductions in crash rates. Employers, their clients, and communities benefit from well-trained employees who drive safely – both on and off the job. Ninety percent of all traffic accidents could be avoided if the driver had just one additional second to process and to act. Make sure your drivers have that second and are taught how to use it – with SAMBA online driver training.

NEWS AND ANNOUNCEMENTS

Welcome to the SAMBA Safety Dashboard Beta! This news section is a repositioning of the news section found on the home page of the FleetWatch Service.

More California Furlough Days in May 2010
The State of California is continuing its Furlough Fridays into June 2010. The stated dates are:

- Friday, 4 June 2010
- Friday, 11 June 2010
- Friday, 18 June 2010

In anticipation of each of these furlough days, you should submit Driver Add requests, Driver Delete Requests and MVR Inquiries by 4:30 PM Pacific on the preceding Thursday evening in order to receive your results the next day. Any requests made after that Thursday evening cut-off will mean that the earliest you'll receive the MVR result would be the following Tuesday morning.

View driver MVRs, citations, alerts, training classes and notes.

Automated Alerts highlight employee issues that need immediate attention. In addition, an alert will notify you when your monthly driver reports are ready for viewing.

FleetWatch Driver Record Monitoring generates the most critical fleet statistics each month, noting the number of unlicensed drivers, current citations reported and upcoming license expiration dates.

Driver Compliance Files manage and track key driver compliance documents including Department of Transportation (DOT) mandated files, as well as custom documents defined by your organization. Receive alerts for documents that are missing, or need to be updated.

Accident Tracking allows you to upload critical crash documents, record costs, auto loss, injuries and fatalities, and immediately links each incident to the responsible Driver's Profile.

Online Driver Training Classes can be assigned to an individual, or a group of drivers – and with only a few keystrokes. Class completions are automatically included in the employee's Driver's Profile.

Background Checks can be ordered for county, state and national records. Verify Social Security numbers. Quickly search for name matches against the National Sex Offender Registry and the Terrorist Watch List.
